

GMP compliance and management responsibility

Are you ready to elevate your quality systems and lead with confidence?

In the world of pharmaceuticals and life sciences, compliance isn't optional - it's critical. This course unpacks the essential principles of Good Manufacturing Practice (GMP), with a sharp focus on the vital role of management in ensuring compliance, quality, and accountability.

Management has a clear understanding of the EU and FDA GMP requirements and supports these in daily operations. The importance of compliance is recognized in the enabling of the desired quality mindset. Through a clear understanding of a manager's responsibility in a GMP regulated environment, you will know how to

- Embed GMP principles into your organization's culture
- Understand regulatory expectations
- Drive a proactive, quality-first mindset across your department

The course language is English.

Target group

Managers in life science (with little or no GMP experience)

(Senior Management)

Production & Manufacturing Managers

Supervisors and Team Leads

R&D and Technical Managers

Your benefits

- Gain a clear, practical grasp of GMP requirements and what regulators expect from management, reducing personal compliance risk and increasing confidence during inspections
- Learn how to integrate quality and compliance considerations into strategic and daily decisions, enabling better risk management and operational efficiency
- Strengthen your ability to lead quality-focused teams and demonstrate proactive compliance leadership—key qualities for advancing in regulated industries

Your company's benefits

- Empowered leaders help cultivate a top-down culture of quality and compliance, minimizing deviations, recalls, and regulatory citations
- With trained managers understanding their responsibilities, your organization is better prepared for audits, inspections, and ongoing GMP compliance
- Improved compliance management leads to fewer errors, less rework, and more efficient quality systems—saving time, resources, and reputation

Course agenda

09.00 – 16.00

- GMP requirements
- Compliance
- Management responsibility
- Personnel and training
- Quality mindset

The course will be a combination of interactive lectures and group work.
